Technostrobe ranks No. 167 on the 2016 Profit 500!

PROFIT and Canadian Business unveil 28th annual list
of Canada's Fastest-Growing Companies

Coteau-du-Lac, September 15, 2016 – Canadian Business and PROFIT today ranked Technostrobe No. 167 on the 28th annual PROFIT 500 list, the definitive ranking of Canada's Fastest-Growing Companies. Published in the October issue of Canadian Business and at PROFITguide.com, the PROFIT 500 ranks Canadian businesses by their five-year revenue growth.

Technostrobe made the 2016 PROFIT 500 list with a five-year revenue growth of 400%.

"Companies become a part of the PROFIT 500 ranking through innovative thinking, smart strategy and sheer grit," says James Cowan, Editor-in-chief of PROFIT and Canadian Business. "These firms demonstrate what Canadian entrepreneurs can achieve, both at home and across the globe."

"Technostrobe is honoured to be on the PROFIT 500 ranking, even more so, as we celebrate the company's 15th anniversary" says Vice-President Francis Lacombe. He adds "This achievement reflects the dedication our team has shown over the last few years to successfully launch innovative LED lighting solutions for the benefit of customers in our industry."

What distinguishes Technostrobe is a constant desire to surpass customer expectations by designing, engineering and manufacturing innovative lighting solutions and by providing made-to-measure design, complete engineering drawings and technical expertise during installations.

"We are proud of our accomplishments but we are even more excited about delivering new and even better solutions for the next 15 years," concludes Francis Lacombe.

About Technostrobe

Technostrobe has been manufacturing obstruction lights for tall towers since 2001. Its mission is to help pilots fly safely by providing innovative, robust and energy efficient lighting technologies. They serve customers in the broadcasting, telecommunications and wind farm industries. All solutions are certified as compliant with the highest aviation and electrical standards (FAA, Transports Canada, ICAO) and are available with advanced SNMP remote monitoring capabilities.
