

OBSTRUCTION LIGHT SYNCHRONIZATION MODULE

SLSM-GPS

FEATURES

- For use with Technostrobe controller
- Designed especially for synchronization of obstruction lights on wind farms, at river crossings, near airports, or simply for towers close together
- Connects up to 12 satellites
- Self running timer in case of lost GPS signal

SPECIFICATIONS

Electrical value

Working voltage	5V from Technostrobe controller.
-----------------	----------------------------------

Mechanical

Weight	0,5 Kg (1 lb.)
--------	----------------

Antenna dimensions (diameter x height)	64 mm x 20 mm (2½" x ¾")
---	-----------------------------

PCB dimensions (width x height)	50 mm x 76 mm (2" x 3")
------------------------------------	----------------------------

Others

Operating temperature	-40°C to 55°C (-40°F to 122°F)
-----------------------	-----------------------------------

Warranty	2 years
