

# OBSTRUCTION LIGHT SYNCHRONIZATION MODULE

## SLSM-GPS

---

### FEATURES

---

- For use with Technostrobe controller
- Designed especially for synchronization of obstruction lights on wind farms, at river crossings, near airports, or simply for towers close together
- Connects up to 12 satellites
- Self running timer in case of lost GPS signal

### SPECIFICATIONS

---

#### Electrical value

---

Working voltage 5V from Technostrobe controller.

---

#### Mechanical

---

Weight 0,5 Kg (1 lb.)

---

Antenna dimensions (diameter x height) 64 mm x 20 mm (2½" x ¾")

---

PCB dimensions (width x height) 50 mm x 76 mm (2" x 3")

---

#### Others

---

Operating temperature -40°C to 55°C (-40°F to 122°F)

---

Warranty 2 years

---
